

that the inventions of groups one and two are distinct, although absolutely no showing of such distinctness has been made.

In this case, the limitations of claims 30-32 are within claim 1.

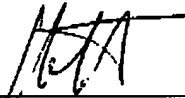

The Examiner's attention is directed to 37 C.F.R. 1.141(b) where allegedly different classes of inventions may be included and examined in a single application provided they are so linked as to form a single inventive concept. This is exactly the type of case for which the rule was promulgated, i.e., to avoid burdensome and unnecessary restrictions. It is also asserted that the requirement to restrict the present application would be an unnecessary burden upon the Applicants and the Examiner's failure to follow the mandates of the statute and regulation would be a denial of due process. For these reasons it is respectfully urged that the restriction requirement be rescinded.

Respectfully submitted,

Richard S. Roberts  
Reg. No. 27,941
